

Healthy Hunger Relief

Reaching more than 15 million food insecure Americans with healthier food

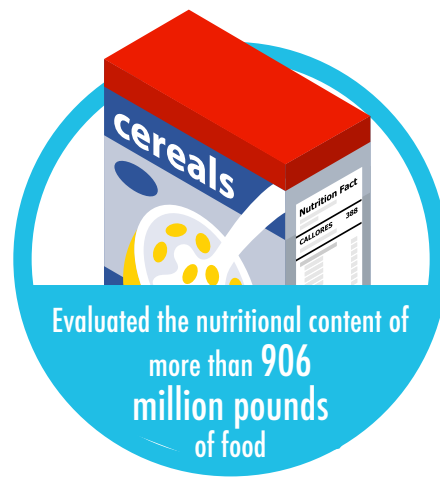

When we began our work with food banks in 2016 — our Healthy Hunger Relief program — we knew from experience that emergency food assistance was the first line of defense against hunger. We were also uniquely positioned to assist food banks in getting the bad food off their shelves and the good food in.

Our partners get tailored support to implement a comprehensive nutrition ranking system and over time, provide healthier, high-quality, culturally relevant, and nutritious foods in their communities.

We are working with:

60 partners in **27** states
to reach **millions** of food insecure Americans

Since we started our work with food banks, our partners have:

“Hunger relief is about so much more than just filling an empty stomach. Thanks to this support from PHA, we’ll have the ability to purchase even more of the healthy, fresh foods that nourish the body and spirit, and also introduce a food ranking system to help make choosing wholesome food options incredibly easy.”

– Carmen Cumberland, President and CEO, Community Harvest Food Bank.
